Dear Resident,

New rapid charging point proposed on Salmon Lane

This document outlines our proposals for the introduction of an electric vehicle charging point and associated electric vehicle only bay. You can respond to this consultation online at:

<https://talk.towerhamlets.gov.uk/en-GB/projects/lbth-rapid-charger-project>

Alternatively, you can email the address above, quoting reference 'LBTH Rapid Chargers' and make clear the locations(s) to which the representation refers.

The closing date for the return of the questionnaire is 15th April 2026.

Background

Tower Hamlets Council is looking to expand its electric vehicle charging network to further support the adoption of low emission electric vehicles and reduce air pollution across the borough. The demand for Electric Vehicle (EV) in Tower Hamlets is very high and continue to grow annually. To meet the demands of this growth the council is working to add more charging points to its existing network.

What is being proposed

We are proposing to introduce a double charging point on Salmon Lane which will serve a single dedicated bay where only electric vehicles will only be able to park if they are charging.

Please see attached, a plan of the proposed location and an example of what the electric vehicle charge point will look like.

Yours sincerely,

Tower Hamlets Council
